

# PRESENTATION AND DISCUSSION

## HEALTH CARE WASTE MANAGEMENT – FROM RESISTANCE TO COMPLIANCE

Health Care Waste Management is still a neglected topic in many countries. Theory and practice often differ vastly, and despite increasing efforts, the value chain of waste management is not obvious and potential benefits are not immediately visible to invest in a waste management model.

The project team from Kyrgyzstan will share their experiences in supporting the establishment of a sustainable cost-effective, low-technology national health care waste management system.

We invite you to discuss challenges and opportunities for health care waste management.

**Thursday, 27 June 2019**

**2 p.m. – 3.30 p.m.**

**Swiss Red Cross  
Rainmattstrasse 10  
3001 Bern**

**Please confirm your participation until Friday, 14<sup>th</sup> June 2019 to [selina.keller@redcross.ch](mailto:selina.keller@redcross.ch)**
